CONNECTSW PRESENTS

AI Fluency

The Enterprise AI Readiness Platform

Measure, develop, and certify workforce AI competency using Anthropic's empirically-validated 4D Framework — the only assessment built on 9,830+ real AI conversations.

Confidential • March 2026 • Seed Round

The Problem

A $2.52 trillion market with no measurement standard

94%
of companies have NOT started AI upskilling programs (PwC)

56%
wage premium for workers with AI skills (PwC)

44%
YoY growth in AI training market

2/3
of leaders report a data or AI skills gap (DataCamp)

Today: Broken AI Training

Assign generic courses → Watch videos →
Get certificate → No behavioral measurement

Result: L&D cannot prove ROI. Budget gets cut. Cycle repeats.

Three Systemic Failures

- **No standardized measurement** — generic quizzes and course completions don't measure behavioral fluency
- **No validated framework** — existing tools test AI knowledge, not competency
- **No personalized remediation** — generic training wastes budget; L&D teams can't demonstrate pre/post ROI

Market Opportunity

Three converging forces create a blue-ocean window

Anthropic's 4D Framework

Published Feb 23, 2026. Empirical data from 9,830 conversations. 24 behavioral indicators. **No one else builds on it.**

DOL AI Literacy Mandate

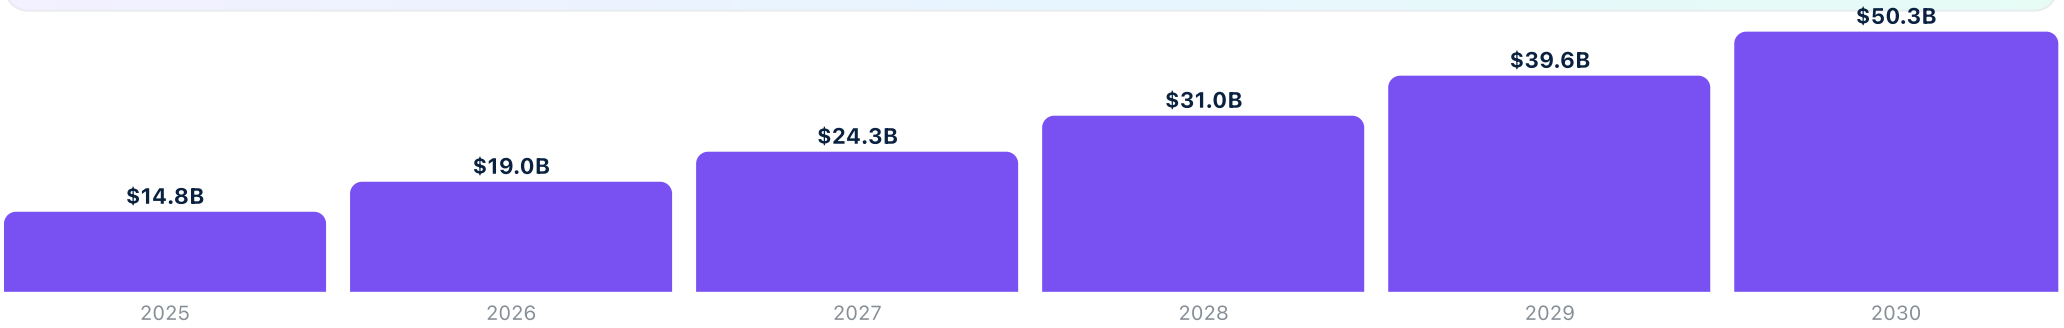
US Dept of Labor framework (Feb 13, 2026). 5 content areas + 7 delivery principles. **Enterprises must comply.**

Explosive Market Growth

Enterprise AI platform market: **$14.8B → $50.3B** by 2030 (27.7% CAGR). Skills assessment sub-segment: **$15–20B**.

Blue-Ocean Intersection

Validated Assessment Framework + Behavioral Measurement + Personalized Remediation + Enterprise Analytics + DOL Alignment = **unoccupied by any competitor**



Enterprise AI Platform Market (Verdantix) • 27.7% CAGR

The Solution

AI Fluency: Measure what matters — behavioral competency, not quiz scores

Learner takes 4D Assessment (25 min, 32 questions) → Scored across 24 behavioral indicators → Personalized learning path (weakest first) → Reassessment shows measurable improvement → L&D proves ROI with data

D1

Delegation

Knowing *when* and *what* to delegate to AI. 7 indicators covering task decomposition, human judgment retention, and iterative refinement.

67% prevalence in conversations

D2

Description

Crafting effective prompts and instructions. 6 indicators: context provision, constraint specification, format direction, example usage.

Observable in real prompts

D3

Discernment

Evaluating AI outputs critically. 6 indicators: output verification, bias detection, hallucination awareness, quality assessment.

Largest gap: 49% overconfidence

D4

Diligence

Responsible and ethical AI use. 5 indicators: attribution, privacy, transparency, continuous learning, ethical boundaries.

Regulatory compliance driver

Product Features

Enterprise-grade assessment platform with 6 core capabilities

4D Behavioral Assessment

- 32 scenario-based questions
- 24 behavioral indicators scored
- Prevalence-weighted algorithm
- 11 observable + 13 unobservable
- 25-minute completion time
- Resume mid-assessment

Personalized Learning Paths

- Weakest-dimension-first ordering
- Interactive exercises per indicator
- Discernment gap training module
- Progress tracking per dimension
- Recommended resources
- Retake with improvement tracking

Role-Specific Templates

- 6+ role templates included
- Custom role configuration
- Industry-specific scenarios
- Difficulty calibration
- Three interaction modes
- Automation/Augmentation/Agency

Organizational Dashboard

- Aggregate fluency scores
- Department-level breakdown
- Trend analysis over time
- ROI metrics and reporting
- Exportable quarterly reports
- Industry benchmarking

Enterprise Integration

- SAML/OIDC SSO (Azure AD, Okta)
- LTI 1.3 for Canvas, Moodle, Blackboard
- SCORM export for existing LMS
- REST API for custom integrations
- Webhook notifications
- Multi-tenant data isolation (RLS)

Certification & Compliance

- Digital credentials (badges)
- Verifiable certificates
- DOL AI Literacy alignment
- GDPR/CCPA compliant
- Configurable data retention
- Audit trail for compliance

Competitive Landscape

First platform to implement Anthropic's validated 4D framework for enterprise assessment

Capability	AI Fluency (Ours)	iMocha	DataCamp	Udemy Business	Anthropic Academy
4D Framework Assessment	**CORE**	**No**	**No**	**No**	**No**
24 Behavioral Indicators	**All 24**	**No**	**No**	**No**	Teaches concepts
Prevalence-Weighted Scoring	**Yes**	**No**	**No**	**No**	**No**
Personalized Learning Paths	**Per dimension**	**No**	Partial (data)	**No**	**No**
Discernment Gap Detection	**Targeted**	**No**	**No**	**No**	Mentions concept
Role-Specific Templates	**6+ roles**	Generic	Data roles	**No**	**No**
Organizational Dashboard	**Yes**	**Yes**	**Yes**	Basic	**No**
Enterprise SSO	**Yes**	**Yes**	**Yes**	**Yes**	**No**
LMS Integration (LTI)	**Yes**	**Yes**	**Yes**	**Yes**	**No**
Longitudinal Tracking	**Yes**	Partial	**Yes**	Completion only	**No**

Key Insight: Anthropic Academy creates framework *awareness* (demand generation) but provides **no assessment tooling**. We fill the measurement gap they create.

Target Customers

Three segments, six personas, clear willingness to pay

PRIMARY: ENTERPRISE L&D

~5,000 orgs

Fortune 5000 with 500+ employees

ACV: $50–200K/year

"I need to prove AI training ROI to leadership with measurable behavioral data."

SECONDARY: HIGHER EDUCATION

~4,000 inst.

Universities integrating AI fluency

ACV: $10–50K/year

"I need validated assessments that flow into Canvas grades via LTI."

TERTIARY: GOVERNMENT

~2,000 agencies

DOL framework compliance

ACV: $25–100K/year

"We must align with DOL AI Literacy Framework requirements."

Key Buyer Personas

Lisa — L&D Manager	Recommends tools, needs ROI proof
David — VP/CTO/CLO	Approves budget, views dashboards
Raj — IT Administrator	Can block on security; needs SSO/RLS
Prof. Sarah — Instructor	Course-level adoption, LTI required

Why They Buy

- Organizations investing 1–4% of payroll in AI training see **40–120%** productivity improvement
- When employers provide AI training, adoption jumps from **25% → 76%**
- AI-literate orgs are **2x more likely** to see significant AI ROI

Business Model

SaaS subscription with enterprise and education tiers

STARTER

Free

Individual learners

- 1 assessment per quarter
- Basic fluency profile
- Limited learning resources
- No organizational features

Purpose: Top-of-funnel & demand generation

ENTERPRISE

$50–200K

Per year • 500+ seats

- Unlimited assessments
- Org dashboard & analytics
- Role-specific templates
- SSO + LMS integration
- Dedicated success manager
- DOL compliance reporting

EDUCATION

$10–50K

Per year • Per institution

- LTI 1.3 integration
- Class-level analytics
- Grade passback to LMS
- Academic pricing
- Instructor dashboard
- SCORM export

Revenue Projections

Year 1	20 enterprise customers	**$500K ARR**
Year 2	60 enterprise + 40 education	**$2M ARR**
Year 3	150 enterprise + 100 education + gov	**$5M ARR**

Unit Economics (Target)

Average ACV (Enterprise)	**$25K**
Gross Margin	**80%+**
CAC Payback	**< 12 months**
Net Revenue Retention	**120%+ target**

Go-to-Market Strategy

Framework-led demand generation with enterprise sales motion

Demand Generation (PLG)

- **Free individual assessments** — virality through shareable fluency profiles
- **Content marketing** — whitepapers on 4D framework, DOL alignment guides
- **Anthropic ecosystem** — complementary positioning alongside Anthropic Academy
- **Conference speaking** — ATD, SHRM, EDUCAUSE (L&D + EdTech)
- **SEO/thought leadership** — "AI fluency assessment" keywords

Enterprise Sales Motion

- **Free pilot program** — 30-day trial for 50 seats, frictionless conversion
- **Champion-led sale** — L&D manager (Lisa) recommends to VP (David)
- **ROI-driven close** — pre/post assessment data proves training impact
- **Land & expand** — start with one department, expand org-wide
- **Channel partnerships** — consulting firms (Deloitte, Accenture, McKinsey)

Strategic Moat

Framework Lock-in
First to productize the 4D framework. Assessment data creates switching costs as orgs build longitudinal baselines.

Network Effects
More assessments = better benchmarking data. Industry norms become proprietary assets. Organizations want comparative data.

DOL Compliance
Federal mandate creates non-discretionary buying. Government procurement cycles create durable revenue once won.

Technology Architecture

Enterprise-grade SaaS built on proven stack with security-first design

Tech Stack

Frontend	Next.js 14 + React 18 + Tailwind CSS
Backend	Fastify + TypeScript + Prisma ORM
Database	PostgreSQL 15 with Row-Level Security
Cache	Redis (sessions, leaderboards)
Auth	JWT + SAML/OIDC SSO
CI/CD	GitHub Actions + Docker
Hosting	Cloud-native (AWS/GCP)

Scoring Algorithm

Prevalence-weighted scoring derived from Anthropic's 9,830-conversation dataset. Each behavioral indicator has empirical prevalence rates that weight its contribution to dimension scores.

Key innovation: Discernment gap detection identifies where users *think* they're proficient but behavioral data says otherwise.

Security & Compliance

- **Multi-tenant isolation** via PostgreSQL Row-Level Security — data physically separated per tenant
- **GDPR/CCPA compliant** — configurable data retention, right to deletion, consent management
- **SOC 2 Type II** target (Year 2)
- **Encryption** — TLS 1.3 in transit, AES-256 at rest
- **Audit logging** — every assessment action logged for compliance
- **RBAC** — Platform Admin, Org Admin, Manager, Learner roles

Integration Architecture

- **LTI 1.3** — Canvas, Moodle, Blackboard (grade passback)
- **SCORM 2004** — export for legacy LMS
- **REST API** — custom integrations, HRIS sync
- **Webhooks** — assessment complete, cert issued events
- **SSO** — SAML 2.0 (Azure AD, Okta, OneLogin)

Product Roadmap

MVP in Q3 2026, enterprise GA in Q4 2026, education launch Q1 2027

1 **Foundation**
Q2 2026
Auth, multi-tenancy, assessment engine, scoring algorithm, Prisma schema

2 **MVP**
Q3 2026
4D assessment UI, fluency profiles, basic learning paths, individual dashboards

3 **Enterprise GA**
Q4 2026
Org dashboards, SSO, role templates, team management, DOL reporting

4 **Education**
Q1 2027
LTI integration, SCORM export, class analytics, grade passback

5 **Scale**
2027+
AI-powered adaptive assessments, benchmarking, certifications, API marketplace

MVP Scope (Q3 2026)

- User registration & authentication (JWT)
- 4D assessment engine (32 questions)
- Prevalence-weighted scoring algorithm
- Fluency profile with dimension radar chart
- Basic learning path generation
- Assessment history & progress tracking
- Responsive web application

Current Progress (~30% built)

- **Foundation architecture complete**
- **Multi-tenant data model (RLS)**
- **Authentication system (JWT + roles)**
- **Assessment API endpoints**
- **Scoring algorithm (ADR-002)**
- **CI/CD pipeline configured**
- Assessment UI — in progress
- Learning paths — planned

Traction & Validation

Research-backed framework with regulatory tailwinds

Framework Validation

- **9,830 real conversations** analyzed by Anthropic researchers to derive the 4D framework
- **24 behavioral indicators** empirically identified (11 observable, 13 unobservable)
- **Prevalence rates** established per indicator — powers our scoring algorithm
- **Peer-reviewed research** — Anthropic's AI Fluency Index (Feb 2026)
- **Discernment gap** quantified — 49% of users show overconfidence in AI output evaluation

Regulatory Tailwinds

- **US DOL AI Literacy Framework** (Feb 13, 2026) — 5 content areas, 7 delivery principles, federal mandate
- **EU AI Act** — requires AI literacy for operators; creates compliance demand
- **Executive Order on AI** — federal workforce AI readiness requirements
- **Corporate governance** — boards increasingly require AI readiness reporting
- **Insurance/risk** — AI literacy becoming a factor in operational risk assessments

Market Validation Signals

2x
AI-literate orgs more likely to see significant AI ROI

76%
AI adoption when employers provide training (vs 25%)

40-120%
productivity improvement from AI workforce investment

$2.52T
AI training market growing 44% YoY

The Team — ConnectSW

AI-first software company with 17 specialist AI agents shipping production code

Company Overview

ConnectSW is an AI-first software company where Claude Code agents handle all execution under CEO direction. Our AI workforce of 17 specialist agents delivers:

- **7 active products** in production or development
- **Full-stack delivery** — from PRD to deployment
- **Enterprise-grade quality** — TDD, security scanning, CI/CD
- **Rapid iteration** — features ship in hours, not weeks

AI-Native Development

Our development model gives us a structural cost advantage:

- **17 specialist agents** (backend, frontend, QA, security, DevOps, etc.)
- **Parallel execution** — multiple agents work simultaneously
- **24/7 development** — no timezone or availability constraints
- **Consistent quality** — agents follow codified standards
- **Low burn rate** — AI execution cost vs. human engineering team

ConnectSW Product Portfolio

AI Fluency	ConnectGRC	RecomEngine	CodeGuardian
AI Assessment Platform	GRC Platform	Recommendation Engine	Code Security

THE OPPORTUNITY

The AI Fluency Gap Is Real. We Have the Only Validated Solution.

$50.3B	Zero	$5M
Market by 2030	Competitors with 4D framework	ARR target by Year 3
